New Product, August 2009

In This Issue

ADC402

SLD Deluxe

Greetings!

Elsema is a foremost manufacturer and reseller of electronic products such as wireless transmitters, receivers, radio data modules, garage door remotes and different types of door and gate controller cards with good quality accessories at affordable prices.

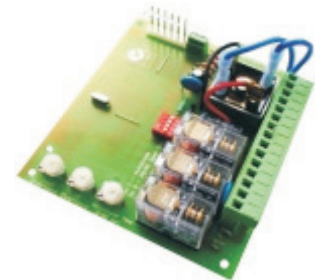

Elsema has yet again introduced 2 new products to its gate controller series, the ADC402 and the SLD Deluxe. We are committed to provide our customers with the most advance technology and very user friendly products

ADC402

The [ADC402](#) is a more user friendly and advance version of its predecessor the [ADC302](#). Automatic Doors in recent years have become part of our lives. We want shopping malls, restaurants, factories and even our homes to have Automatic Door Controllers installed. Elsema's ADC402 is the perfect choice for this application.

Features:

- 2 Versions : ADC402-12 is used for 12VDC motors. ADC402-24 is used for 24VDC motors. Motors with ratings of up to 6 Amps can be operated
- Plug-in type terminal blocks.
- Auto-Close time of 2-60 seconds comes as factory defaults. Other times are available upon request.
- Adjustable open/close overload settings.

Other options such as auto close, open only, security close are simply selected by setting a 4-way dipswitch on board.

Get full details on our [website](#).

SLD Deluxe

The all new [SLD Deluxe](#) card is used to control an automatic door/gate that has a single 240VAC motor.

Features:

- Small Footprint (145mm x 130mm)
- Plug in type terminal blocks for easy wiring.
- Motor travel timer
- User selectable options such as auto close, open only, security close.
- Photo cell input, push button input, wireless remote control operation and 24VAC (100mA) output.

Options such as, Auto Close, Open Only and Security Close are user

selectable by simply using the on board 6-way dip switch.
