

10 Amps solar charger with MPPT and Bluetooth

Part Number **MPPT 75/10**

Charging Current 10 Amps

FEATURES

-) MPPT: Ultra Fast Maximum Power Point Tracking
-) Easily configured for 12V or 24V setup
-) Short circuit protection
-) Reverse polarity protection
-) Over charging protection
-) Under voltage protection

Should only be used for Solar Application

MPPT: Ultra Fast Maximum Power Point Tracking

By constantly monitoring the voltage and current output of your solar (PV) panels, MPPT technology ensures maximum energy harvesting of power from solar panels. The advantage of this is most noticeable when the sky is partially clouded or when the light intensity is constantly changing.

Remotely control and monitor the extensive features of the MPPT charger with built-in Bluetooth by pairing it with your smartphone or other device via VictronConnect App.
